

CAN'T QUIT LINKEDIN? FIX IT.

LinkedIn is where deals start. Its inbox is where they go to hide.

Our first build found hundreds of conversations that went cold. Here are the three tools behind it, what each one does, what it costs and how they fit together.

Three tools, one job each Numbered in the order we'd add them.

1 • THE INBOX

GTM-API

gtm-api.com

Brings your LinkedIn messages to your AI assistant.

Connects your LinkedIn account, Sales Navigator included, so your assistant can read, search and sort every conversation. You never share your password.

Free	1 account, slower sync
Paid	\$39 a month per account

Account risk **Highest** ●●●

Our take. Start here, on the free plan. The slower sync is fine for a first build. It's the only tool that uses your login, which is why it rates highest. Full refund at the workshop if that's a dealbreaker.

2 • THE PEOPLE

Derrick

derrick-app.com

Turns a LinkedIn search into a lead list.

A Google Sheets add-on. Paste a LinkedIn or Sales Navigator search and get a sheet of people with titles, companies and verified work emails.

Free	100 credits a month
Paid	€20 a month, 10,000 credits

Account risk **Low to moderate** ●●○

Our take. Stay in Sheets, where the €20 plan covers it. Skip phone lookups at 150 credits each. Sales Navigator imports need a Sales Navigator seat.

3 • THE SIGNALS

Bright Data

brightdata.com

Tells you what your contacts are posting about.

Pulls public LinkedIn profiles, posts and company pages. It never logs in as you, so nothing touches your account.

Free	5,000 records a month
Paid	\$1.50 per 1,000 records

Account risk **None to your account** ○○○

Our take. Use its ready-made AI connector, no code needed. Add it once your inbox is running.

Your AI assistant ties it together Claude Pro or ChatGPT Plus, \$20 a month. It reads from all three and tells you who to answer first, which conversations went cold and what your contacts care about this week. Nothing sends unless you send it.

What it costs to run

SETUP	PER MONTH
Try it Free plans on all three tools, plus your AI.	\$20
Daily use, one seller Paid GTM-API, Derrick in Sheets, Bright Data free, plus your AI.	about \$81

Both setups include \$20 a month for Claude Pro or ChatGPT Plus. Euro prices converted at September 2026 rates.

Keep your account safe

- 1 Read, don't send.**
Reading your inbox is the quietest thing a tool can do on LinkedIn. Automated sending is where the risk climbs.
- 2 No other LinkedIn automation.**
GTM-API and Derrick already share your account. LinkedIn sees the combined activity, not each tool on its own.
- 3 Move the heavy lifting off your login.**
Watch posts in Bright Data, which never logs in as you. Derrick uses your session, so run a search when you need a list, not on repeat.

HANDS-ON WORKSHOP · 2 HOURS · NO CODING EXPERIENCE NEEDED

Fix your LinkedIn inbox. Never lose a lead again.

Build the inbox with us, live online with 5 to 15 people. You leave with your own LinkedIn inbox on your computer and a list of the conversations that went cold. \$199 per person, with a full refund at the start if the account risk isn't for you.
